Art Unit: 1724

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. It is suggested that "AND METHOD" be deleted from the title.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: In claims 1 and 21 "20 to 150 psi" lacks clear antecedent basis in the specification as originally filed. It is noted that paragraph [0080] is drawn to "75 to 150 psi" and original claim 9 includes basis for "20 to 150 psi". It is suggested that the specification be amended to include a - pressure of 20 to 150 psi -, to overcome this objection.

Claims 1-3, 6, 7, 10, and 21-41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 21 are considered incomplete because it is essential to the instant method that the bed support be capable of resisting the process fluid pressure required to move said process liquid through said filter bed at said pressure. Claims 2, 3, 6, 7, 10, and 22-41 depend from the above claims

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1724

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3, 6, 7, 10, and 21-41 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,638,422. Although the conflicting claims are not identical, they are not patentably distinct from each other because the structure of the apparatus recited in the instant claims appears to be fully encompassed by the claims of the patent.

Claims 1 and 21 properly written to overcome the above 35 USC 112 rejection would be allowable upon the filing of a proper terminal disclaimer.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
